Training-cum-Workshop on
Water Resources Management
(for NGOs and Media Personnel's)
26-27 March 2020

Organized by & at
National Water Academy
Pune

Introduction and Objectives

The natural resources scenario of the country is changing fast both in terms of availability as well as quality. Looming climate change will alter the paradigm of management of natural resources. Water is critical natural resources and is being affected by increasing population, industrialization, urbanization, pollution, deforestation and above all climate change. We have to fight Water Scarcity by striking a balance between Water Usage and Water Replenishment through sensitizing all the stakeholders.

In the long run, to tackle the water stress condition, the consensus and synergized approach of government departments, NGOs, Civil Society and Media will be required to get the desired impact. There are many NGOs who are actively working in the Water Resources Field, particularly, at the grass root level. Water education, Water Conservation, Watershed Development, reviving traditional practices etc are some of the areas on interest for NGOs. Similarly, media too have influence on the thinking and opinion of the society about the water sector. Media plays an important role in building the public opinion and also brings in public awareness. It is essential that the personnel from NGO and Media working in this area have proper domain knowledge and they understand the complexities, issues and challenges of the sector. The sensitization of personnel associated with media, newspaper and NGOs is required about various government measures launched over the years, current water management practices and strategy for facing the challenges of the sector etc. Periodic training of this group is the need of the hour to inculcate right thinking and proper perspectives for the sector.

Recognizing the importance of capacity building of NGOs and media personnel, the National Water Academy (NWA) in the past have been conducting such training and the present program is also part of this endeavor.

Program Contents

This program will cover following aspects:

- Overview of Water Resources Sector in India
- Constitutional provisions for water in India
- Role of CWC in irrigation development, Flood Management, Disaster Management, Water Quality Management etc.
- Flagship programs of GoI in Water sector
